

Suggested materials: Cardstock works best, and regular paper works as well; scissors; crafting blade; and tape or glue.

Cut out the eye openings: Carefully cut out the detector-shaped eye holes. A sharp craft blade works best.

Make the eye covers: Cut out the eye covers, fold them along the indicated lines, and tape them together. Once secured, use a sharp blade to cut a small eye hole through both the front and folded layers.

Attach the eye covers: Slide the finished eye covers over the glasses to complete your Roman Vision!
