

NASA'S EXOPLANET EXPLORATION PROGRAM PRESENTS:

# THE ROASTED PLANET

**CAN YOU HEAR THIS EXOPLANET SCREAMING?**

AS HD 80606 b APPROACHES ITS STAR FROM AN EXTREME, ELLIPTICAL ORBIT, IT SUFFERS STAR-GRAZING TORTURE THAT CAUSES HOWLING, SUPERSONIC WINDS AND SHOCKWAVE STORMS ACROSS THE PLANET. ITS TORTUROUS JOURNEY BOILS ITS ATMOSPHERE TO A HELLISH 2,000 DEGREES FAHRENHEIT EVERY 111 DAYS, ROASTING BOTH ITS LIGHT AND DARK SIDES. HD 80606 b WILL NEVER ESCAPE THIS SCORCHING NIGHTMARE.
