Code of Conduct

Guidelines for Participants

- 1. Professional Conduct:** Participants are required to conduct themselves professionally and treat others with respect. This applies to all workshop-related activities and interactions across all formats, including video, audio, text, and chat communications. Discussions should focus solely on the scientific merits of ideas and results; personal attacks are unacceptable.
- 2. Language and Behavior:** All communications should employ appropriate and respectful language. Participants should remain aware and respectful of the cultural differences that exist among attendees.
- 3. Consent for Sharing Content:** Before sharing any recordings or presentation materials (e.g., slides, video clips) on external media or platforms, explicit consent must be obtained from both the speaker and the workshop organizers. Posting slides or excerpts on social media platforms is encouraged to promote scientific dialogue, provided the speaker has not expressed opposition to such sharing at the start of their presentation.
- 4. Inclusivity and Non-Discrimination:** Discriminatory behavior or harassment based on gender, gender identity, race, ethnicity, national origin, religion, political affiliation, age, marital status, sexual orientation, disability, or any other characteristic is strictly prohibited. All participants are expected to contribute to a respectful and inclusive environment.
- 5. Reporting Violations:** Should any participant witness or experience a breach of this Code of Conduct, they are encouraged to report it directly to the workshop organizers (i.e., the ACROSS leadership, Adam Goldstein, Cori Fletcher). You may also report Code of Conduct violations [here](#). If you would like to remain anonymous, please use "Anonymous" in the designated sections. The workshop organizers are committed to ensuring a productive and safe experience for all attendees. Violations of this Code of Conduct may result in disciplinary actions, including warnings or revocation of access to the workshop platforms.
