

A bird's-eye comparison of the Fomalhaut ring with our solar system

In this graphic, Fomalhaut's ring, about 25 billion miles across its inner diameter, is compared with our inner and outer solar system.*

Fomalhaut ring

Outer solar system

Kuiper belt

Inner solar system

Asteroid belt

Mars

Earth

Venus

Mercury

Jupiter

Sedna orbit

**Juxtaposition of the Fomalhaut ring and Sedna's and our solar system's orbits is for comparison purposes only.*
