

# STAR SPACE TELESCOPE AUGMENTED REALITY

**The Hubble  
Space Telescope**

**The James Webb  
Space Telescope**

**The Nancy Grace Roman  
Space Telescope**

**STScI** | SPACE TELESCOPE  
SCIENCE INSTITUTE

Expanding the Frontiers of Space Astronomy

# The Nancy Grace Roman Space Telescope

## Mid-2020s Launch Date

- 2.4-meter mirror with a field of view 100 times greater than Hubble
- Sensitivity to light: Visible to near-infrared
- Will orbit the Sun 940,000 miles from Earth

Roman will produce large-scale maps of the night sky at the highest resolution we've ever had.
