and social media data

International Observe the Moon Night is a worldwide celebration of lunar science and exploration and the Moon in arts and culture. Each year, everyone on Earth is invited to observe and learn about the Moon together, and to honor cultural and personal connections with our nearest celestial neighbor.

Find resources, register your participation, and
learn more at moon.nasa.gov/observe.

PARTICIPATE

Host or join an event, or observe on your own! Events range in size from small family gatherings to community celebrations, and can be held virtually or in person.

OBSERVE

We encourage you to interpret 'observe' broadly. Go out and look at the Moon, take a virtual field trip to the Moon, share your favorite Moon stories, paint a lunar landscape, eat through the Moon phases with cookies— the possibilities are endless. For hands-on activity ideas, NASA lunar science updates, and telescope live streams of the Moon, visit moon.nasa.gov/observe.

EXPLORE

Humans are returning to the Moon! More than 50 years after the Apollo program first landed people on the lunar surface, NASA is working to bring crewed missions to the Moon once again. A fleet of robotic spacecraft is helping us prepare to land safely in areas of rich scientific interest. International Observe the Moon Night is an opportunity to discuss the past, present, and future of planetary science and exploration.

International Observe the Moon Night is sponsored by NASA's Lunar Reconnaissance Orbiter mission and the Solar System Exploration Division at NASA's Goddard Space Flight Center, with many contributors and supporters.
