

## ANNULAR SOLAR ECLIPSE

## TOTAL SOLAR ECLIPSE

**ECLIPSE**  
●●●●●  
2023 THROUGH THE EYES OF NASA

 2024 Total Solar  
**eclipse**  
THROUGH THE EYES OF NASA

Find More: [solarsystem.nasa.gov/eclipses](https://solarsystem.nasa.gov/eclipses)

Join us for an annular solar eclipse on Saturday, October 14, 2023, and a total solar eclipse on Monday, April 8, 2024. Want to excite and engage learners? Explore Eclipse Resources: [solarsystem.nasa.gov/eclipses/resources](https://solarsystem.nasa.gov/eclipses/resources)

When watching a partial, annular, or total solar eclipse directly with your eyes, you must look through safe solar viewing glasses (“eclipse glasses”) or other safe solar filters at all times. Learn more about eclipse safety: [go.nasa.gov/EclipseEyeSafety](https://go.nasa.gov/EclipseEyeSafety)
